

About ACEBEAM PT10

- ◎ ACEBEAM PT10 is the perfect 2*AAA flashlight in a very small size, Intelligent high efficiency circuit board improves performance and maximizes run-time automatically while protecting the board from high temperature damage
- ◎ Furthermore, the design featuring 3 modes of output with simply operation. you can get Middle, Low, High brightness by simply pressing the tailcap switch.
- ◎ If you are looking for a powerful, long running time EDC flashlight in the smallest size. ACEBEAM PT10 is your perfect companion.

2

Features

- ◎ LED: Cree XPL-HD W2 with a lifespan of 50,000 hours
- ◎ Max 360 lumens output using 1*AAA NI-MH or Alkaline battery
- ◎ Three types of output:
 - Middle :30 lumens(5 hours)
 - Low : 3 lumens(38 hours)
 - High : 360 lumens(1.6 hours)
- ◎ Peak beam intensity:1046cd
- ◎ Max beam length: 65meters
- ◎ Impact resistance: 1.5 meters
- ◎ Waterproof to IPX8 standard
- ◎ Working Vlotage: 0.9V to 3.0V
- ◎ Size:79mm(length) x 17.1mm(diameter)
- ◎ 20-gram weight(excluding battery)
- ◎ Be capable of standing up securely on a flat surface to serve as a candle
- ◎ Made of durable aircraft-grade aluminum
- ◎ Premium Type III hard-anodized anti-abrasive finish
- ◎ Toughened ultra-clear glass lens with anti-reflective coating.
- ◎ Include a stainless steel clip
- ◎ Warranty:60months.

Notice: The above-mentioned parameters (tested with sanyo eneloop 2*AAA HR6 750mAh battery)are approximate and may vary between flashlight, batteries, and environments.

Usage and Maintenance

- ◎ Please don't disassemble the sealed head, doing so may cause damage to the flashlight.
- ◎ Please take your battery out of the flashlight if you will not use the light for a long time, or the power of the battery has run out. Otherwise, some poor batteries may leak and damage the light.
- ◎ Please replace the O-ring if it becomes damaged after using for a long time, and regularly lubricate the O-rings so as to not erode the rubber. Doing so will also keep the flashlight properly sealed against water
- ◎ Clean the contacts of your light periodically, especially when the flashlight flickers abnormally or cannot light up. There may be several reasons for a flickering or not working light.

Reason 1: the batteries need to be replaced

Solution: replace batteries (confirm the correct installation of anode and cathode).

Reason 2: The threads, PCB board contact or other contacts are dirty.

Solution: clean the contact points with an alcohol soaked cotton swab.

If the above methods do not solve the issue, contact your distributor and refer to the warranty policy.
